

Audience Bakery and StationPlaylist

StationPlaylist Studio is the software behind the **Bakery Oven**, our on-air broadcast playback system for your studio.

An uncluttered screen and large control buttons makes this one of the easiest to use broadcasting applications available.

We selected StationPlaylist because of its simplicity. Studio takes the work out of managing multiple players. Studio manages and controls multiple players internally for such purposes as automatic voice track / song intro overlapping. Plus an advanced intelligent crossfader means that all tracks mix together perfectly with no human intervention.

Streaming your station on the Internet in multiple codecs is simple. And there's audio processing and RDS software at a fraction of the price of hardware solutions.

Unlike the legacy systems dominating North America, StationPlaylist does not require a database, has flexible file names, and works on multiple platforms including Windows 7.

The screenshot shows the StationPlaylist Studio software interface. The title bar reads "StationPlaylist Studio - Wolfman Jack". The menu bar includes File, Edit, View, Controls, Wolfman Jack Carts, Shift Carts, Ctrl Carts, Alt Carts, and Help. The date is Tuesday, 15 April 2008. The interface displays the current time as 5:01:54 p.m., a timer at 58:06, and "2 mins past 5" with a temperature of 20.5°C. Playback controls include Play, Stop, Automate, and Insert buttons. The track status is shown as: Last Track: Madonna - Love Profusion; Playing Now: <Break Note> - News via satellite (03:00); Next Track: The Rascals - People Got To Be Free (02:53). A playlist table is visible below:

Artist	Title	Duration	Intro	Category
-----	Hour Marker -----	1700 (5pm 15/04/2008)		Hour Marker
<Break Note>	News via satellite	03:00		Break Note
Promo	Station ID long	00:12		Promos
The Rascals	People Got To Be Free	02:53		60s Rock
Voice Track	Apr14-1701	00:08		Voice Track
Cat Stevens	Where do the children play	03:46	30.0	70s Pop
Promo	Station ID short	00:02		Station ID
Sting	A Thousand Years	05:48		90s Pop
AD	Body Therapy Clinic	00:30		Voice Track

At the bottom, there are playback statistics: Track Starts 17:06:05, Elapsed Time 01:54, Track Time 03:27, Remaining Time 01:06, Playlist Remaining 61:54, Total for Hour 63:48. There are also buttons for Mic and Line In, and a "StationPlaylist" logo. The status bar at the bottom shows: Up time: 332 hrs 59 mins, Scheduled for 05:06:05pm, Next Creation: 22/04/2008 11:15 p.m., 10 Listeners.

For more information call Audience Bakery Client Services at 866-480-RADIO x7445 or call your representative directly.

The Bakery Oven On-Air System includes StationPlaylist Studio Pro software, an FTP program to properly import voice tracks, imaging, music, news, and other audio elements, various audio processing models for the system. See hardware specifications for requirements to run this system.

We install and test the system at the Bakery and ship it ready to go when you get it.
